Civic Works

Who We Are

Energy Efficient Maryland is dedicated to lowering energy costs for Maryland households, preserving affordable housing, protecting Maryland's environment, and building a stronger state economy through energy efficiency.

ENERGY EQUITY FORUM

Purpose

Our Energy Equity Forum brings together energy consumers, community leaders, and advocates to explore how issues of energy intersect with housing and finances. Black Marylanders, especially in Baltimore, carry the largest energy burdens, putting those families at increased risk of illness and economic and housing insecurity. Our forum aims to educate community members about ways to reduce their energy burden through energy efficiency and renewable energy.

At the forum, you will learn about the following:

- * Practical changes you can make at home as well as programs you can participate in to lower your energy and water bills.
- * Energy saving options, like energy efficiency, water efficiency, and solar, that can reduce your energy bills and bring exciting new job opportunities to your community.
- *And more!
